Dear Katrina Lee,

After seeing the job listing on LinkedIn, I am thrilled to be applying for Ottawa's fastest-growing company as a web developer at Elite Solutions. As someone who is highly focused and attentive to detail, I thrive on building quality systems that surpass expectations. I'm thrilled at the opportunity to show off my technical expertise and leadership skills as part of Elite Solutions' team.

During my previous role at Broadway, I gained experience working in a fast-paced environment, therefore I am familiar with the challenges offered by a fast-growing company. I am very patient and effective, quality code takes time and patience. School and personal projects allowed me to familiarize myself with all the newest web development trends, such as HTML, CSS and JS. Also, I was able to develop time management and excellent communication skills in English, French and Arabic while working with co-workers and helping customers.

In addition, I have experience in programmes and trouble-shooting with python, java and C++. I would like to mention that I have familiarised myself with Microsoft Sharepoint, Microsoft Office, Github and Visual Studio while working on school projects. These tools allowed me to share my work with others and communicate my ideas with teammates and investors. Currently, I am working on a school project with a team of 6 where we get to create a website to market our product. In order to overcome the challenges, I made sure to communicate with my team, both in English and French, to make sure everyone was on the same page. I made sure to be respectful and fun to work with to keep my team motivated and to increase the productivity of the team.

I believe I am well suited to be working with Elite Solutions' team as a web developer. I have sent you my resume, which has more information about why I would be valuable to your team. If you have any questions or concerns please contact me by email at maldu064@uOttawa.ca or by phone at 819.860.1639. I am eager to demonstrate my commitment to developing world-class software for Elite Solutions. I would appreciate an opportunity to meet you and discuss details about your company and the position that I am applying for.

I thank you for your time and consideration, I look forward to speaking with you soon.

Sincerely,

Mahmoud Al-dujaili
